Attend Our Holiday Hearing Celebration!

***Come join us on Wednesday,
December 11th from Noon to 5 PM***

Our Holiday Celebration provides us the opportunity to say thank you to all of you who have made 2002 such a successful year. The event will be fun for everyone who

Assistive Listening Devices

Hearing aids are often recommended to improve communication when a hearing loss is not medically or surgically correctable. Many recent technological advances have led to significant improvements in hearing aid performance.

ALD's are available for those difficult cases that cannot be corrected solely by using hearing aids. These devices generally fall into the following categories::

1. Personal face to face communication and listening to TV or the radio
2. Telephone communication
3. Listening devices for the home environment

ALD's help reduce the limits that distance, background noise reverberation

attends. There will be plenty of food, entertainment and good conversation.

You'll make new acquaintances and probably see old friends. Attendees will also have the opportunity to win valuable prizes. We'll feature displays of the latest technology and assistive listening devices and I will be available to answer all of your questions.

Our *Holiday Hearing Celebration* provides an excellent opportunity for you to bring that family member or friend who has a hearing loss but has yet to take that first step to better hearing. All non-hearing aid wearers who attend are invited to receive a free hearing screening. Videos about hearing and hearing aids will be shown and product literature will be available. Patients who bring non-hearing aid wearers to the event will receive free hearing aid batteries.

If you plan to attend the event, please RSVP no later than December 6th so we can plan accordingly. I look forward to seeing you all on December 11th.

Jeff Grama, M.A.

Estate Planning Attorney to Attend December Celebration

Elaine Abbott, an estate planning attorney located in Century City, has joined our Preferred Patient Program as a consultant. Ms. Abbott is a graduate of Loyola Law School. After gaining valuable experience with a large Los Angeles law firm, she entered into private practice in 1994.

At our celebration on December 11th, Ms. Abbott will be available to speak to Preferred Patient members about estate planning. So, if you have specific questions concerning a will or living trust, you are invited to take advantage of this unique opportunity. I am sure you'll appreciate Ms. Abbott's knowledge, warmth and understanding.

Assistive Listening Devices

(continued from page 1)

and distortion can cause by bringing sound directly from its source into your hearing aids or ears. This is done by connecting your hearing aids to the sound source using an FM or infrared device.

Better telephone communication can be achieved by using amplified telephones or FM systems.

Multitone ringers, flashing lights and vibrating devices can assist in alerting you to incoming phone calls, doorbells, fire alarms, a crying baby or the speech of somebody in an adjacent room. These same devices can be coupled to a special clock for wake up alarms or time reminders.

Many of these devices are offered through our office and some can be obtained for no charge through government agencies. Ask Jeff or Dana for details.
