Our 2nd Annual Holiday Hearing Celebration: Bigger and Better

On behalf of Dana and my wife, Susan, I would like to thank those who attended our second annual Holiday Hearing Celebration. All of us are delighted that everyone had such a good time.

We are always interested in hearing from patients. So, if you have comments concerning last December's celebration, give us a call.

I look forward to seeing you throughout the year and at our third annual celebration this December.

Sincerely,

Jeff

I know I need a hearing aid But what should I buy?

Hearing Aid Services of Hollywood will be holding a series of workshops throughout 2004. These events will be informative for hearing aid wearers and non-wearers who have a hearing loss.

The workshops will take place in the comfortable, sound-treated screening theater located adjacent to our office. They will be held in support of *Hope for Hearing*, a local non-profit charity that provides services for the hearing impaired. Admission is free; however, attendees are asked to donate their old hearing aids and/or contribute \$10 to Hope for Hearing.

Topics will include an overview of the latest digital technology, a realistic look at what to expect from hearing aids, a critique of the latest digital hearing instruments, and how to judge which hearing aid style is best for you. *Preferred Patient Program* members and their guests are entitled to priority reservations as seating will be limited. If you are not already a member of the *Preferred Patient Program*, please contact our office to join. Membership is free. You'll receive a membership card and other valuable benefits.

For the dates and times of the workshops, contact our office at (323) 463-7109.

The New Widex Diva Offers Major Breakthroughs

by Jeff Grama, M.A.

Widex has introduced the behind-the-ear Power Diva for those who have a severe hearing loss of up to 100 decibels. The Power Diva utilizes adaptive directional microphone technology

Continued on page 2

Power Diva: Continued from page 1

for isolating speech from noise, a strong telephone system, electronic noise reduction, anti-feedback circuitry and a fifteen-channel amplifier for more precise correction of your hearing problem. The result is an incredibly clear reproduction of sound that you have to hear to appreciate.

The less powerful models of the Diva continue to provide outstanding performance for those individuals with mild to severe hearing loss. These units are available in all styles, including completely-in-the-canal, mini-canal, canal, full shell and behind-the-ear models.

I have so much confidence in the advantages of these remarkable products, that I want to give you every opportunity to experience how they can improve the quality of your life. Therefore, I am extending our trial period to 60 days for any of the Diva instruments. Once you have experienced the performance of these advanced digital hearing instruments, you will agree that the benefits far exceed what you've experienced with other hearing aids.

We will honor this offer through the month of May. *Preferred Patient Program* members who schedule an appointment will be entered into a drawing to receive two free tickets to the Hollywood Bowl.

Free Phones Available

Did you know that the State of California provides a free amplified phone for all hearing impaired individuals? This program has been available for many years, but many of you have not taken advantage of it. To get your free phone all you need to do is call us for an appointment so we can assist you in completing the appropriate forms.
